JANIT B

Salem, Tamil Nadu, India | +91 6380286204 | janit.b2006@gmail.com | linkedin.com/in/janit2006 | github.com/JNT-h04

PROFESSIONAL SUMMARY

Computer Science undergraduate (AI & ML specialization) with a strong foundation in Object-Oriented Programming, Data Structures & Algorithms, and REST API development. Hands-on experience building and deploying full-stack AI applications, integrating APIs into production client workflows, and collaborating across cross-functional teams. Seeking a Software Engineer role to apply core software engineering fundamentals alongside applied AI/ML experience.

EDUCATION

Vellore Institute of Technology, Chennai 2023 to Present
B.Tech, Computer Science and Engineering (Artificial Intelligence and Machine Learning) | CGPA: 8.24/10

Sri Chaitanya School, Salem Until 2023
Class 12th: 83.8% | Class 10th: 86.2%

INTERNSHIP EXPERIENCE

Strategy Fox International Pvt. Ltd. | AI & Software Engineering Intern May 2026 to June 2026

- Developed a real-time AI voice agent using ElevenLabs, integrating REST APIs and dynamic variables into conversational workflows to automate customer support processes.
- Built and integrated AI-driven conversational flows using object-oriented backend logic and REST API calls, automating business processes for live client systems.
- Customized and maintained Shopify e-commerce websites for client projects, including feature enhancements, store configuration, and ongoing maintenance.
- Collaborated with cross-functional teams, including design, product, and client stakeholders, to deliver production-ready AI and e-commerce solutions.

TECHNICAL SKILLS

Languages: Python, Java, C++, SQL, C

Core CS Fundamentals: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), REST API Development, Software Design Principles

AI/ML & Frameworks: PyTorch, TensorFlow, Scikit-learn, CNN, LSTM, Transformers, Hugging Face, LangChain, FAISS, RAG, FastAPI, Streamlit

Tools & Platforms: Git, GitHub, AWS, Shopify, ElevenLabs, VS Code

PROJECTS

AI Meeting Assistant with ASR, Summarization & RAG
Python, LangChain, Hugging Face, FAISS, Whisper, Streamlit, REST APIs

- Developed an AI-powered meeting assistant with a modular, object-oriented architecture that transcribes audio, generates summaries, and enables semantic search via Retrieval-Augmented Generation (RAG).
- Built a Streamlit web application exposing REST API endpoints and integrating Whisper, LangChain, and FAISS for real-time transcript generation and context-aware question answering.

AI Book Summarizer with Streaming Output
Python, FastAPI, Gemini API, PyMuPDF, React, TypeScript

- Built a FastAPI service that reads PDF, DOCX, EPUB and TXT books and splits them into chapters by detecting document headings rather than cutting at a fixed page count.
- Streamed chapter summaries, key insights and flashcards from the Gemini API to a React interface as they are written, with automatic fallback to another model if a response fails mid-stream; deployed live on my portfolio.

AI-Powered Structural Crack Severity Detection
Python, TensorFlow, CNN, OpenCV, Streamlit

- Developed a CNN-based computer vision model, structured with object-oriented design, to classify structural crack severity from uploaded images.
- Built a Streamlit web application that predicts crack severity, estimates likely causes, and provides AI-assisted preventive maintenance recommendations.
